

UV Light Train Operator/Technician

Innovative specialty construction contractor in the underground infrastructure rehabilitation industry seeks a UV Light Train Operator/Field Technician.

Our aggressive business development stance means the work may take you throughout the U.S., Canada, Mexico, and South America, so applicant must be willing to travel Monday-Friday, and to work in all weather conditions. Required knowledge and skill set includes a basic understanding of computers, a propensity for electronics, and a mind for problem-solving. Must be a proactive team player who works well with fellow employees and can interface effectively with various government entities. A positive, can-do attitude and sound work ethic will ensure a good fit with our existing team. Pay commensurate with experience. To apply, call **605-838-8384** or email
